

CAPABILITY STATEMENT

Established 1997

"Our mission as a proudly Tasmanian owned civil construction company is to provide our clients with high-quality, cost-effective projects on schedule through employing and supporting motivated, adaptable and focused members of our local community. We strive to create strong relationships and will endure to remain true and fair throughout our dealings with all employees, clients, merchants, and partners. Our clients can rely on our loyalty, motivation, and our integrity. We pride ourselves on our accomplishments and will continue to grow as a company throughout Tasmania."

ABOUT

Zanetto Civil is a proudly Tasmanian based, owned and operated civil construction company. Since the company's inception in 1997, Zanetto Civil has thrived, establishing a strong reputation throughout both public and private sectors of the civil construction industry, including local councils and water authorities.

We specialise in all aspects of civil contracting. Works include water and sewer pump stations, water and sewer reticulation, drainage, roadworks, retaining walls, subdivisions and plant hire. Our company proudly offers a large fleet of high-performance machinery including excavators ranging from 2-40 tonne, backhoes, bobcats, rollers, and trucks.

Zanetto Civil currently employs a team of over 20 highly experienced employees capable of undertaking all aspects of the civil construction industry. Our team are all proudly Tasmanian and understand the importance of quality and credibility. We take pride in our workmanship, which has led to the successful completion of projects ranging from small civil works to large scale operations valued over \$4 Million. Along with providing an experienced team, Zanetto Civil applies industry best practice OH&S policies and procedures and environmental policies and procedures.

In 2023 Zanetto Civil acquired AJ Water. The purchase of AJ Water has given us the opportunity to expand and offer a more diverse range of capabilities in the civil sector including vac truck operations, horizontal directional drilling, pipe repair systems and more. The acquisition has also expanded our existing fleet of excavators and trucks and increased and diversified our employee numbers and skills.

CONSTRUCTION CAPABILITIES

PLANT:

- 1 x 1.8 Tonne Excavator
- 1 x 3.5 Tonne Excavator
- 2 x 5 Tonne Excavators
- 1 x 7 Tonne Excavator
- 1 x 8 Tonne Excavator
- 4 x 13 Tonne Excavators
- 2 x 20 Tonne Excavators, 1 with GPS system
- 1 x 40 Tonne Excavator
- 3 x Hydraulic Rock Breakers suitable for 8T, 13T, 40T
- 2 x Skid-steer loaders including trencher, broom and auger up to 600 mm
- 1 x Backhoe
- 2 x Vac Trucks
- 2 x 5 Yard Trucks
- 4 x 7 Yard Trucks
- 2 x 10 Yard Trucks
- 2 x Truck and Trailers
- 1 x 2.4 Tonne Twin Drum Roller
- 1 x 2.7 Tonne Twin Drum Roller
- 1 x 12.5 Tonne Single Drum Roller
- 2 x GPS Rover Systems and 1 base station
- HDPE Welding Equipment

SERVICES:

- Sewer Pump Stations
- Sewer Mains
- Sewer Rising Mains
- Water Pump Stations
- Water Reticulation
- Stormwater Installation
- Block Retaining Walls
- Footpaths and Carparks
- Sub-Divisions
- Poly-Pipe Welding
- Earthworks
- As-constructed Data and Processing

TRAINING / CERTIFICATIONS

- Construction Industry White Card
- Confined Space
- Survey & Set Out
- Quality Awareness
- Traffic Management
- Traffic Planning
- Drainage & Pipeline Systems Infectious Diseases
- Gas Detector
- Polyethylene Electro Fusion Welding
- Working at Heights
- First Aid
- Butt Welding
- Dogman Skills
- Workplace Health & Safety
- Pipe Laying
- Plant Operator Competency
- Safety Systems

MANAGEMENT PROFILES

PAUL ZANETTO

Managing Director & Project Manager

Paul Zanetto entered the civil construction industry in 1988 as a foreman for Boral. After being elevated to construction manager, Paul left Boral to establish Zanetto Civil in 1997. Paul now boasts over 30 years' experience in the civil construction industry. His role in the development of Zanetto Civil has been pivotal in the company's success. Paul has experience in all operational aspects of the company, including cost and quality control, project management, programming of works, and tender preparation. Paul's responsibilities are now more focused on tender preparation, contract administration and business development.

RICHARD YOUNG

Project Manager

Richard is qualified in engineering and contract administration, with over 20 years engineering and project management experience. Richard joined Zanetto Civil in 2014, after initially working as a Research Engineer for the Australian Maritime College, and more recently as a Project Manager for Gradco Pty Ltd. Richard is experienced throughout all areas of cost and quality control, project management, programming of works, tender preparation, and contract administration. Richard approaches all aspects of his role as Project Manager with integrity, a high level of detail, professionalism and is considered an integral member of the company.

NATHAN ZANETTO

Project Manager

Nathan is a qualified Civil Engineer who graduated from the University of Tasmania with Honours in 2018. He previously worked as a design engineer at IPD Consulting Pty Ltd from 2018 to 2021 where he undertook design and documentation of water, sewer and stormwater infrastructure for both private enterprise and government authorities. Since joining Zanetto Civil Nathan has been involved with the management of numerous projects including subdivisions, rain gardens, car parks, hardstands, stormwater renewals and more. Nathan is a professional member of the team and ensures each project is delivered to a high standard whilst managing construction costs and maintaining strong client relationships.

ELIH HENNESSY

Project Manager

Elih graduated a Civil Engineering degree with Honours in 2021 from the University of Tasmania. After graduating he worked at Hazell Bros where he progressed from undergraduate engineer to site engineer over three years. Elih brings a detailed and well-planned approach to managing construction and costs on each project and has worked on a range of projects including Devonport Wharf Development Stage 1, Toll Launceston Redevelopment, Georgetown Subdivision, Leith Highway Intersection Upgrade and West Tamar Highway Upgrade. Tackling each day in a professional manner, Elih plays a key role in the Zanetto Civil team.

STEVE NAS

Foreman

Steve has been a Foreman with Zanetto Civil since 2006. Steve's qualifications include First Aid, Traffic Management, Dogman Skills Training, Confined Space Entry, Polyethylene Electro Fusion Welding, Plumbing/Drainage Trade Certificate, and Concrete Pipe Laying (Cert. 2). Steve has constructed numerous Sewer Pump Stations, Rising Water Mains, and Trunk Mains, ranging in value from \$250,000 to \$4.2 Million. Steve is well respected as a capable, honest and reliable member of the company.

NICK RICHARDSON

Foreman

Nick has been a foreman with Zanetto Civil since 2020. Nick's qualifications include First Aid, Traffic Management, Electrofusion welding, Confined Space Entry, and Pipeline Training. Nick has undertaken a range of projects including road works, bulk earthworks, retaining walls, bridge repairs, stormwater pipelines, and working in creeks. Projects undertaken by Nick range in value from \$300,000 to \$2.0 Million. Nick is considered a forward thinking, dependable, and capable member of the company.

STEPHEN ZANETTO

Foreman

Stephen was a supervisor with Roadbore Tasmania since 2004 and is now with Zanetto Civil. He brings 40 years of civil experience to our company and is highly respected with his quality of workmanship. Stephen has extensive amounts of experience in Sewer, Water and Stormwater. Stephen has undertaken construction of large sewer pump stations, subdivisions, pipe cracking, directional drilling and pipe bursting. His commitment to delivering projects on time and on budget are outstanding.
